<b>Office Action Summary</b>	<b>Application No.</b> 10/562,425	<b>Applicant(s)</b> FERRATO ET AL.	
	<b>Examiner</b> Sanh D. Phu	<b>Art Unit</b> 2618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because:

Functional blocks shown in figures 1, 4 and 5 should be provided with corresponding descriptive and functional labels. For instance, block (12) is suggested to be labeled with "Base Station", etc. Correction is required.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the

filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Claim Rejections – 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 40 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 40 recites the limitation "A computer program product capable of being loadable in the memory of at least one computer and including software code portions for performing the method of any one of claims 21 to 33".

The specification of the instant application does not disclose an adequate and enabling disclosure for the claimed "computer program product". It is found nowhere in the specification, a detail disclosure of the "computer program product", "memory" and "software code portions" for enabling the claimed "computer program product". In the specification, page 7, it is only found a description "In a preferred embodiment of the invention, an objective configuration criterion is identified together with a corresponding operating process adapted for implementation in a dedicated software architecture. Such an architecture is capable of analyzing the environment surrounding each antenna in terms of path (that is the attenuation to which the electromagnetic signal is subjected over the path between the antenna and each point in the area covered) and in terms of a traffic level forecast, estimated or actually measured for a given service or a complex set of services". However, neither the detail disclosure of the "computer program product", "memory" and

"software code portions" for enabling the claimed "computer program product" nor other information supporting other details of claims 40, 21-33 are found in said description.

*Allowable Subject Matter*

4. Claims 21-39 are allowed.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References 7096040, 5719583 and 6442405 are cited because they are pertinent to the claimed method and associated network architecture.
